Course Overview

Mid-Career Course JFY2023

The Mid-Career Course targets those who have about 10 years of work experience in fields related to peacebuilding and development¹, aims to enhance their skills and knowledge on communication/negotiation and leadership/management, and provides an opportunity to develop networks with expert practitioners.

In particular, this Course is designed for those who are determined to utilize their accumulated experience to further their careers in peacebuilding and development, in particular at the United Nations and other international organizations. Work experience in international organizations is not a strong prerequisite for participation in the Course, but a good understanding of such organizations is expected. The Course welcomes applicants from international organizations and diverse backgrounds, including private business and NGOs/NPOs.

The 7-day training course aims to achieve these objectives through interactive discussions and role-play exercises led by experienced facilitators, working on the front lines of peacebuilding and development, at the UN and other international organizations. Along with strengthening the comprehensive adaptability required to overcome challenges such as changes in positions within organizations and increasingly complex responsibilities, the Course also aims to provide feedback from facilitators to each participant on his/her performance. In addition, it offers the participants ample opportunity to develop the networks invaluable for advancing their careers through individual meetings with facilitators, and informal networking events.

The Course will be held in Tokyo and conducted in English. It is open to individuals of any nationality. Please find the curriculum in the next section. The schedule is tentative and facilitators may change accordingly.
