

# HPC Leadership Competency Training Course

## Overview

The HPC Leadership Competency Training Course is designed for those who aspire to enhance their leadership competency to further advance their careers at the United Nations and other international organizations. Work experience in international organizations is not an indispensable prerequisite for participation in the Course, but a good understanding of such organizations is expected. The Course welcomes applicants from international organizations and diverse backgrounds, including private businesses and NGOs/NPOs. The Course especially welcomes those who have work experience in fields related to peace and security, development, and humanitarian aid, are willing to enhance their skills and knowledge in leadership and other competencies such as communication, negotiation, and management, and are keen to develop networks with expert practitioners.

The 5-day training Course aims to achieve these objectives through interactive discussions and role-play exercises led by experienced facilitators working at the UN and other international organizations in senior positions. The Course also aims to provide feedback from facilitators to each participant on their performance. Additionally, it offers the participants ample opportunity to develop invaluable networks for advancing their careers through individual meetings with facilitators and informal networking events. The Course will be held in Hiroshima, Japan, and conducted in English. It is open to individuals of any nationality.

### Curriculum
